

REVOLUTIONISING
**PROJECT
EFFICIENCY**

PREMIUM MODULAR
BATHROOM PODS

interpod
offsite

► A SIMPLE SOLUTION

Traditional on-site bathroom constructions are a notorious source of dramas and delays. Budget blowouts, scheduling disruptions, waterproofing failures and post-construction defects are frequently linked to bathrooms in multi-unit building projects.

Simply put, a building site is far from the ideal place to build a bathroom. Weather conditions, restricted site access and more than 10 trades working on a single room, combine to make bathroom construction far more complicated than it should be.

Interpod's pre-fabricated bathroom pods simply eliminate these complications from the construction process. **Experience shows that using bathroom pods can reduce overall construction time by up to 30%** while minimising labour costs and increasing quality control.

Leading construction companies in Europe have been using pre-fabricated bathrooms in their projects for decades. **Interpod is revolutionising the approach to bathroom construction in Australia with a local, reliable and quality assured solution.**

Ask yourself - how much time, cost and effort could you save by taking onsite bathroom construction out of your critical path?

Easy integration with standard building methods

Ultra-thin floor eliminates the need for slab set downs

WHY INTERPOD BATHROOMS?

- ▶ Reduced construction time
- ▶ Substantial project cost savings
- ▶ Streamlined project management
- ▶ One point of contact from design to installation
- ▶ Reduced environmental impact through waste minimisation
- ▶ Greater control over the cost of materials
- ▶ Superior build quality and finishes
- ▶ Backed by a seven-year warranty

▶ A BETTER WAY TO BUILD BATHROOMS

Introducing Interpod bathrooms. Our innovative modular building solutions are designed for builders, developers and architects seeking to include premium bathrooms in their construction programs while:

- ▶ Reducing construction time
- ▶ Increasing profitability
- ▶ Maximising efficiency
- ▶ Maintaining quality control

Interpod bathrooms are produced and assembled in our purpose-built facilities in NSW. Cutting-edge technology and a **seamless production line process** ensure a finely crafted, made to order product. Stringent monitoring throughout the process **guarantees consistently high quality results.**

Our bathroom pods are **tailored to your specifications** and come completely fitted out with floor and wall tiles/vinyl, light fittings, fixtures and appliances. Pods are fully tested and BCA certified before being delivered to site as completed units.

Once positioned, a simple process connects the building's electrical, plumbing and ventilation systems – **in just 2 to 3 hours on site, the bathroom is complete.**

Our streamlined, offsite construction process means maximum efficiency and a shorter time to market for your project.

▶ WHO WE ARE

Engineering revolutionary alternatives to traditional building methods, Interpod Offsite are the **leading company in Australia producing pre-fabricated bathroom pods for large projects**. We manufacture premium bathroom pods for the residential apartment, healthcare, hospitality, defence and student accommodation sectors.

With a commitment to flexibility and innovation, we custom build bathroom pods to meet the unique requirements of architects, developers, designers and builders. Our pods aren't bound by design limitations – we work closely with you to produce a high quality solution with the **same bespoke look and feel as premium site-built bathrooms**.

With 60 years of combined experience in offsite building, our management team are equipped with superior expertise in designing, producing and installing modular solutions across a variety of applications.

Interpod Production Facilities - NSW

WHAT ARE OUR CUSTOMERS SAYING?

“ Using Interpod has been a seamless process; the ease of design, programme and installation is substantial in comparison to traditional methods.”

“ Through the process we were able to shave months off the overall project programme which in turn saved a considerable amount of P&G cost.”

“ The use of pod bathrooms have allowed us to bring the job in on time and on budget, and this wouldn't have happened with a traditional build.”

“ We have had a very good working relationship with Interpod, and we will have no hesitation in recommending Interpod.”

“ Interpod have been really good in working in with us, both with planning and with their ability to work offsite and keep the project in parallel.”

► THE INTERPOD PROCESS FROM CONCEPT TO COMPLETION

1 DESIGN & PROPOSAL

- Preliminary plans and finishes schedules are all that's required to develop the proposal
- Concept drawings are prepared for each bathroom variation
- Built to architect's individual specifications - no design limitations

2 PROTOTYPE

- Once production drawings and supply agreement are signed off, the prototype bathroom is constructed
- The prototype can be inspected and modified if required by the architect/builder
- This becomes the standard which all pods for the project are built to

3 MANUFACTURE

- Starts earlier than on-site bathrooms, ensuring completion to schedule
- Monitored for quality and compliance at every step

4 TRANSPORTATION

- The finished pods are delivered by truck to site based on your project's timeline requirements
- Deliveries are staged according to the project schedule
- Secure storage available to provide for site delays

5

5 INSTALLATION

- ▶ Pods are installed at a rate of up to 10 units per day
- ▶ Pods can be craned directly into position level-by-level, or onto platforms and wheeled into place
- ▶ Interpod provides the builders site team with any training and specialist equipment required

6

6 CONNECTION

- ▶ All pod services terminate at predetermined connection points for easy hook-up by site trades
- ▶ Low-skill, quick-fit connections used wherever possible
- ▶ The completed bathroom pod is indistinguishable from a high-end site-built bathroom

► FREQUENTLY ASKED QUESTIONS

Are your bathrooms manufactured in Australia?

Our bathrooms are fully designed and manufactured in Australia and meet or exceed all relevant Australian Standards and building codes.

Can you manufacture a custom shape or layout?

Yes. Our bathrooms are 100% custom manufactured and can be tailored to suit virtually any design, installation and functional requirements.

Can I choose my own colours, finishes and fittings?

Absolutely. You are never limited to choosing from a catalogue of interior elements. You have the freedom to select any colour, fitting and finish you desire.

Do I need to change the construction process to accommodate an Interpod bathroom?

Changes, if any, are minimal. We require room to insert the pod, and sometimes a small recess in the slab.

What is your production capacity?

We have the capacity to produce up to 200 pods per month across our Gosford and Singleton production facilities.

How much notice do you need?

The earlier we are involved in the project, the better, however we can be included as late as three months before the bathrooms are required. Although the suggestions we make are often minor, they can make a big difference towards reducing overall construction times.

Is there a minimum order quantity?

Experience shows that benefit is obtained when projects have 20 bathrooms or more. Minimising the number of bathroom types is critical to achieving maximum savings.
